

Looking for work?

In addition to the newspaper try these job search engines on the web:

www.USA.gov – Go to the USA.gov home page, click on the [Jobs and Education](#) section, then [Government Jobs](#).

www.jobing.com – They are committed to being a local job site - a distinct advantage for job seekers in the local Phoenix community.

www.careerbuilder.com – A job search engine that offers a lot of good resources to the job searcher

www.monster.com – You can narrow your search by location, keywords, and employer; plus, Monster has plenty of job search extras: networking boards, job search alerts, and online resume posting.

www.craigslist.org – **There** are all sorts of interesting jobs on Craigslist. Non-profit, systems, government, writing, etc. jobs are all represented here.

www.indeed.com – Indeed uncovers a lot of jobs that you wouldn't normally find on most job search sites

<http://websearch.about.com/od/enginesanddirectories/tp/jobsearchengine.htm> has even more links to job search engines as well as articles of interest to job hunters. BEWARE: it is also loaded with advertising links.
